

Duration: 60 Mins**Total Marks: 10****Q.ID: ITISKILL03545J****1. What is the mechanical cause of engine does not start?**

- A) Oil pump gear worn out B) Oil filter blocked
C) Fuel tank cap vent hole blocked D) Radiator cap blocked

Answer: C) Fuel tank cap vent hole blocked**2. Which is the cause for high oil consumption?**

- A) Low oil level B) Oil viscosity high
C) Oil filter clogged D) Worn-out valve guides

Answer: D) Worn-out valve guides**3. What is the cause for high fuel consumption in diesel engine?**

- A) Oil level high B) Fuel level in tank is high
C) Piston ring worn-out D) High compression pressure

Answer: C) Piston ring worn-out**4. What is the effect of defective oil pump?**

- A) Low oil pressure B) Detonation occur
C) Engine seized D) High oil pressure

Answer: C) Engine seized**5. Why a diesel engine starts but not running idle?**

- A) Clogged nozzle B) Low charged battery
C) No air in fuel system D) Low fuel level in tank

Answer: A) Clogged nozzle**6. What is the cause for high oil consumption?**

- A) Weak compression B) Clogged air cleaner
C) Coolant level D) Clogged oil filter

Answer: A) Weak compression**7. What is to be checked for low power generation of engine?**

- A) Water level B) Clogged oil filter
C) Clogged air cleaner D) Battery condition

Answer: C) Clogged air cleaner**8. What is the effect of defective injector?**

- A) Engine over heated B) Engine does not start
C) High fuel pressure D) High oil pressure

Answer: B) Engine does not start**9. What is the possible cause of engine runs erratically?**

- A) Weak compression B) High compression
C) Air lock in fuel system D) Poor oil circulation

Answer: C) Air lock in fuel system**10. What is the cause for engine fails to start?**

- A) Defective water pump B) Defective thermostat
C) Defective oil pump D) Defective starter motor

Answer: D) Defective starter motor
