

Student Name: _____ Roll No: _____

1. What is the effect of defective oil pump?

- A) Detonation occur B) High oil pressure
C) Engine seized D) Low oil pressure

2. Which is the cause for high oil consumption?

- A) Worn-out valve guides B) Oil filter clogged
C) Oil viscosity high D) Low oil level

3. What is the cause for engine fails to start?

- A) Defective thermostat B) Defective starter motor
C) Defective oil pump D) Defective water pump

4. What is the cause for high fuel consumption in diesel engine?

- A) High compression pressure B) Piston ring worn-out
C) Fuel level in tank is high D) Oil level high

5. What is the possible cause of engine runs erratically?

- A) Weak compression B) Air lock in fuel system
C) High compression D) Poor oil circulation

6. What is the mechanical cause of engine does not start?

- A) Radiator cap blocked B) Fuel tank cap vent hole blocked
C) Oil pump gear worn out D) Oil filter blocked

7. What is the cause for high oil consumption?

- A) Coolant level B) Clogged oil filter
C) Clogged air cleaner D) Weak compression

8. What is the effect of defective injector?

- A) High fuel pressure B) Engine over heated
C) High oil pressure D) Engine does not start

9. Why a diesel engine starts but not running idle?

- A) Low fuel level in tank B) Low charged battery
C) No air in fuel system D) Clogged nozzle

10. What is to be checked for low power generation of engine?

- A) Battery condition B) Clogged oil filter
C) Water level D) Clogged air cleaner
