Q. ID: ITISKILL0381BH

October 2025

GITI Kukanoor

Answer Key

Duration: 30 Mins

Total Marks: 10

Q.ID: ITISKILL0381BH

1. Which category of stainless steel is non-magnetic?

- A) Precipitation hardenable stainless steel B) Duplex stainless steel
C) Ferritic stainless steel D) Austenitic stainless steel

Answer: C) Ferritic stainless steel

2. How many principle ores are there in copper?

- A) Two B) Five
C) Four D) Three

Answer: B) Five

3. Which steel is referred as 'High speed steel'?

- A) Tungsten steel B) Cobalt steel
C) Manganese steel D) Nickel steel

Answer: A) Tungsten steel

4. What is the colour of copper?

- A) Silver grey B) Bluish grey
C) Reddish brown D) Brown

Answer: C) Reddish brown

5. What is the metal other than copper and zinc added in delta metal to resist corrosion?

- A) Lead B) Aluminium
C) Nickel D) Iron

Answer: D) Iron

6. Which alloy steel is used for pendulum of clocks having low coefficient of thermal expansion?

- A) Nickel steel B) Tungsten steel
C) Nickel molybdenum steel D) Vanadium steel

Answer: A) Nickel steel

7. What is the main alloy of stainless steel?

- A) Vanadium B) Cobalt
C) Molybdenum D) Chromium

Answer: D) Chromium

8. Which metal consists of copper as main alloy?

- A) Aluminium B) Brass
C) Lead D) Nickel

Answer: B) Brass

9. Which is the main ore of lead?

- A) Galena B) Cuprite
C) Bauxite D) Dolomite

Answer: A) Galena

10. Which category of stainless steel contains a mixture of ferrite austenite and is magnetic?

- A) Austenitic stainless steel B) Ferritic stainless steel
C) Martensitic stainless steel D) Duplex stainless steel

Answer: D) Duplex stainless steel
