

ITI Quiz - 08-Feb-2026

06:38 PM

Q. ID: ITISKILL0647DP

February 2026

Answer Key

Duration: 30 Mins

Total Marks: 14

Q.ID: ITISKILL0647DP

1. What is the mechanical cause of engine does not start?

- A) Radiator cap blocked B) Fuel tank cap vent hole blocked
C) Oil filter blocked D) Oil pump gear worn out

Answer: B) Fuel tank cap vent hole blocked

2. What is to be checked for low power generation of engine?

- A) Clogged oil filter B) Clogged air cleaner
C) Water level D) Battery condition

Answer: B) Clogged air cleaner

3. What is the effect of discharged battery?

- A) Air lock in the fuel system B) Engine back fire
C) Engine does not crank D) Abnormal noise in the engine

Answer: C) Engine does not crank

4. What is the cause for high oil consumption?

- A) Weak compression B) Coolant level
C) Clogged oil filter D) Clogged air cleaner

Answer: A) Weak compression

5. What is to be checked up if the engine overheats?

- A) Hydraulic fluid level B) Electrolyte level
C) Fuel level D) Coolant level

Answer: D) Coolant level

6. What is reason for low oil pressure?

- A) Defective pressure release valve B) Clogged air filter
C) Oil level is high D) Clogged oil filter

Answer: A) Defective pressure release valve

7. What is the possible cause of engine runs erratically?

- A) High compression B) Poor oil circulation
C) Air lock in fuel system D) Weak compression

Answer: C) Air lock in fuel system

8. What is the effect of defective oil pump?

- A) Low oil pressure B) High oil pressure
C) Detonation occur D) Engine seized

Answer: D) Engine seized

9. What is the cause for high fuel consumption in diesel engine?

- A) Oil level high B) High compression pressure
C) Piston ring worn-out D) Fuel level in tank is high

Answer: C) Piston ring worn-out

10. What is the possible cause of high fuel consumption?

- A) Low fuel in the tank B) High fuel in the tank
C) High compression pressure D) Wrong injection timing

Answer: D) Wrong injection timing

11. Which is the cause for high oil consumption?

- A) Oil filter clogged B) Low oil level
C) Worn-out valve guides D) Oil viscosity high

Answer: C) Worn-out valve guides

12. What is the effect of defective injector?

- A) Engine does not start B) Engine over heated
C) High fuel pressure D) High oil pressure

Answer: A) Engine does not start

13. What is the cause for engine fails to start?

- A) Defective water pump B) Defective starter motor
C) Defective thermostat D) Defective oil pump

Answer: B) Defective starter motor

14. Why a diesel engine starts but not running idle?

- A) Low fuel level in tank B) Clogged nozzle
C) Low charged battery D) No air in fuel system

Answer: B) Clogged nozzle
