

ITI Quiz - 06-Mar-2026

06:22 PM

Q. ID: ITISKILL2168IZ

March 2026

Answer Key

Duration: 30 Mins

Total Marks: 14

Q.ID: ITISKILL2168IZ

1. What is the mechanical cause of engine does not start?

- A) Fuel tank cap vent hole blocked B) Oil filter blocked
C) Radiator cap blocked D) Oil pump gear worn out

Answer: A) Fuel tank cap vent hole blocked

2. What is to be checked for low power generation of engine?

- A) Clogged oil filter B) Battery condition
C) Water level D) Clogged air cleaner

Answer: D) Clogged air cleaner

3. What is the possible cause of high fuel consumption?

- A) Wrong injection timing B) Low fuel in the tank
C) High fuel in the tank D) High compression pressure

Answer: A) Wrong injection timing

4. What is reason for low oil pressure?

- A) Defective pressure release valve B) Oil level is high
C) Clogged air filter D) Clogged oil filter

Answer: A) Defective pressure release valve

5. What is the effect of defective oil pump?

- A) High oil pressure B) Engine seized
C) Detonation occur D) Low oil pressure

Answer: B) Engine seized

6. Why a diesel engine starts but not running idle?

- A) Low charged battery B) No air in fuel system
C) Clogged nozzle D) Low fuel level in tank

Answer: C) Clogged nozzle

7. Which is the cause for high oil consumption?

- A) Worn-out valve guides B) Low oil level
C) Oil filter clogged D) Oil viscosity high

Answer: A) Worn-out valve guides

8. What is the effect of defective injector?

- A) High oil pressure B) High fuel pressure
C) Engine does not start D) Engine over heated

Answer: C) Engine does not start

9. What is the cause for engine fails to start?

- A) Defective oil pump B) Defective thermostat
C) Defective starter motor D) Defective water pump

Answer: C) Defective starter motor

10. What is the cause for high fuel consumption in diesel engine?

- A) High compression pressure B) Fuel level in tank is high
C) Piston ring worn-out D) Oil level high

Answer: C) Piston ring worn-out

11. What is the cause for high oil consumption?

- A) Clogged oil filter B) Clogged air cleaner
C) Weak compression D) Coolant level

Answer: C) Weak compression

12. What is to be checked up if the engine overheats?

- A) Hydraulic fluid level B) Electrolyte level
C) Fuel level D) Coolant level

Answer: D) Coolant level

13. What is the effect of discharged battery?

- A) Engine does not crank B) Air lock in the fuel system
C) Abnormal noise in the engine D) Engine back fire

Answer: A) Engine does not crank

14. What is the possible cause of engine runs erratically?

- A) Air lock in fuel system B) Poor oil circulation
C) Weak compression D) High compression

Answer: A) Air lock in fuel system
