

Monthly Test

Q. ID: ITISKILL8842FB

November 2025

GOVT ITI KUKANOOR

Answer Key

Duration: 30 Mins

Total Marks: 10

Q.ID: ITISKILL8842FB

1. What is the effect of defective oil pump?

- A) Detonation occur
- B) Engine seized
- C) Low oil pressure
- D) High oil pressure

Answer: B) Engine seized

2. What is to be checked up if the engine overheats?

- A) Fuel level
- B) Electrolyte level
- C) Coolant level
- D) Hydraulic fluid level

Answer: C) Coolant level

3. What is the effect of defective injector?

- A) High oil pressure
- B) Engine over heated
- C) High fuel pressure
- D) Engine does not start

Answer: D) Engine does not start

4. What is to be checked for low power generation of engine?

- A) Clogged oil filter
- B) Water level
- C) Clogged air cleaner
- D) Battery condition

Answer: C) Clogged air cleaner

5. What is the cause for high fuel consumption in diesel engine?

- A) Fuel level in tank is high
- B) High compression pressure
- C) Oil level high
- D) Piston ring worn-out

Answer: D) Piston ring worn-out

6. Why a diesel engine starts but not running idle?

- A) Low charged battery
- B) No air in fuel system
- C) Clogged nozzle
- D) Low fuel level in tank

Answer: C) Clogged nozzle

7. What is the mechanical cause of engine does not start?

- A) Fuel tank cap vent hole blocked
- B) Oil pump gear worn out
- C) Oil filter blocked
- D) Radiator cap blocked

Answer: A) Fuel tank cap vent hole blocked

8. What is the possible cause of engine runs erratically?

- A) Air lock in fuel system
- B) Poor oil circulation
- C) Weak compression
- D) High compression

Answer: A) Air lock in fuel system

9. What is reason for low oil pressure?

- A) Oil level is high
- B) Clogged oil filter
- C) Clogged air filter
- D) Defective pressure release valve

Answer: D) Defective pressure release valve

10. What is the cause for high oil consumption?

- A) Coolant level
- B) Clogged air cleaner
- C) Clogged oil filter
- D) Weak compression

Answer: D) Weak compression
